To whom it may concern,

I had the pleasure of supervising Lama's graduation project during the 2025/2026 academic year. Her project, titled "**Malware Detection Framework Using Deep Learning Techniques**" was awarded one of the highest grades among all graduation projects that year. Furthermore, the proposed framework has been registered with the Saudi Authority for Intellectual Property, reflecting the quality and originality of the work.

Lama is determined, insightful, and highly motivated. She has shown a genuine aptitude for research and has an excellent ability to take feedback on board. Throughout the project, Lama consistently demonstrated a strong work ethic, very good technical and analytical skills, and an excellent ability to collaborate effectively with her peers.

I recommend Lama for any academic position, employment opportunity, or scholarship for which she may apply. I am confident that her motivation, research potential, and commitment to her work will enable her to make a valuable contribution to any academic or professional environment.

Please do not hesitate to contact me if you require any further information.

Yours sincerely,

Rawan Sanyour
